

## Acorn Craftivities

Run off on brown construction paper & rough cut.

Students trim and write their name on the back.

Individually call them up to the 'sprinkling' center, to work one-on-one with you or an adult helper.

Children brush glue over the top with a large foam brush.

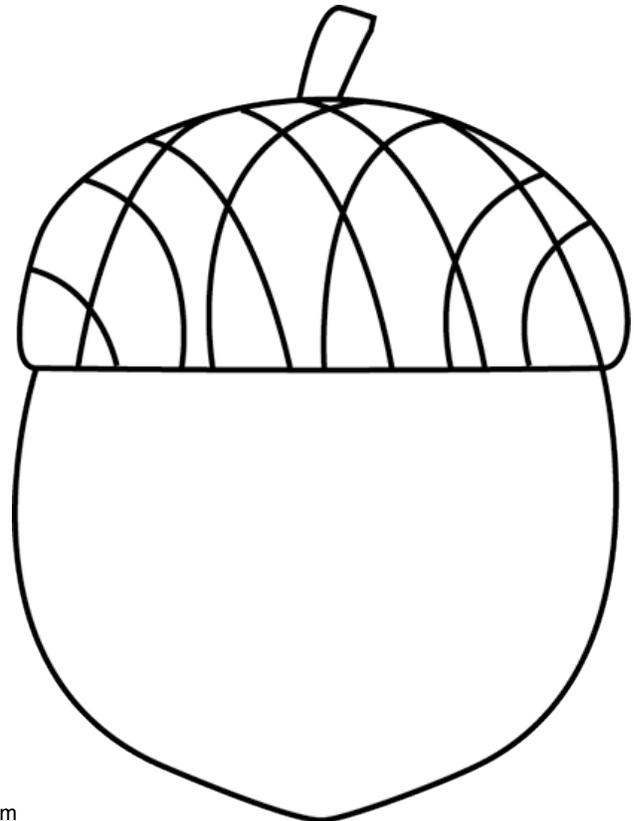

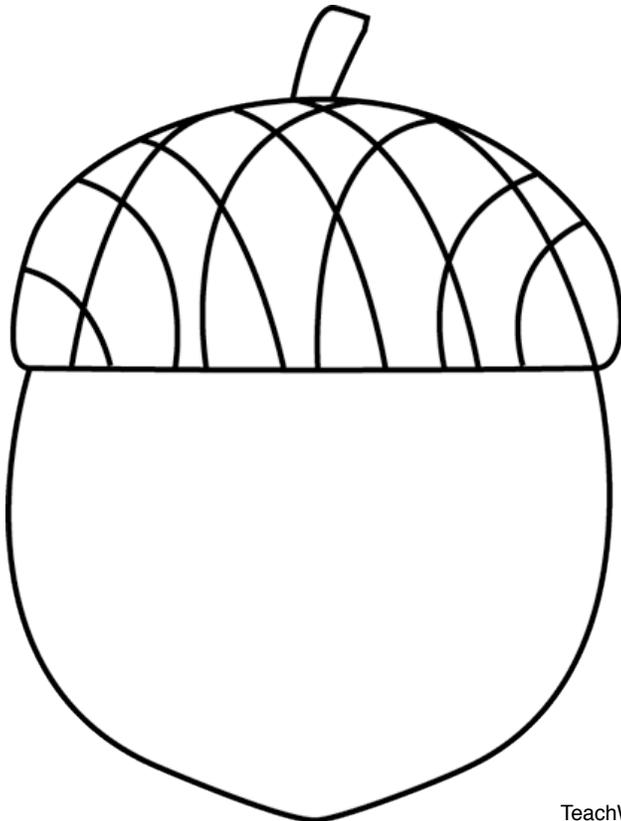

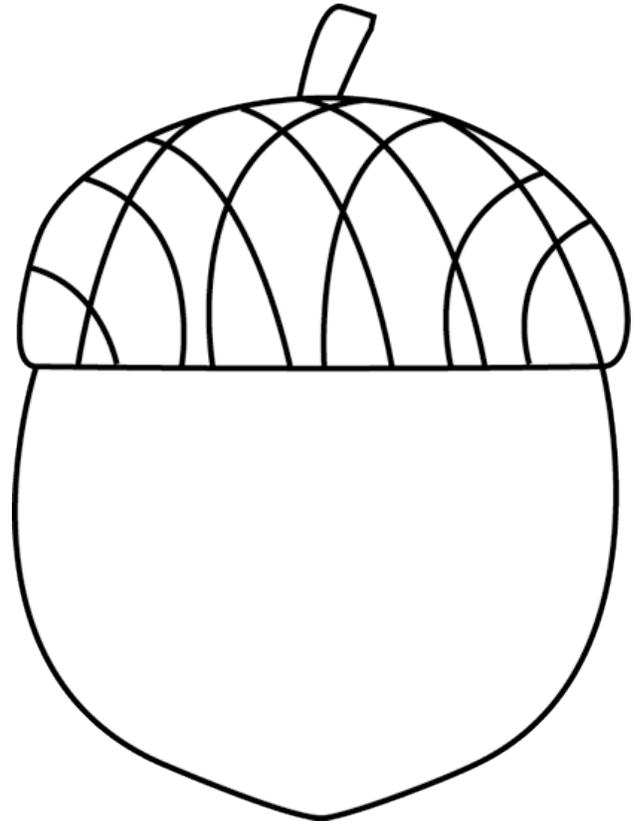

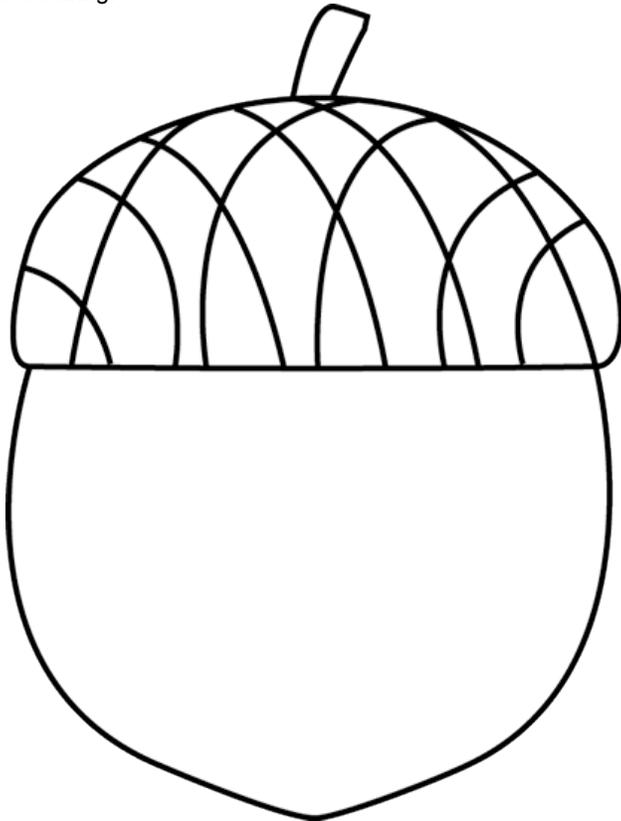

(To avoid a clean-up mess, make sure you have a disposable mat underneath.)

Children sprinkle sesame seeds, poppy seeds or bird seed on the top. Gently shake off excess. Then they brush glue on the bottom. To avoid curling while they dry, don't brush on too much, or don't go over the edges.

Children sprinkle ground cinnamon &/or ground clove onto the bottom. Set aside to dry.

When dry, punch a hole in the stem, and make a yarn or jute loop. Your room will smell wonderful while making these.

Another craftivity you can do with these is to have children write their name on the bottom, you help them trace the letters with glue and then sprinkle with coppery-orange glitter. You can also trace the lines with glue for the top of the acorn and sprinkle with another color glitter like gold. Use them as a border on your bulletin board to display student work. Your caption can be: "We're simply nuts about..." and then fill in whatever you're featuring.

You can use this bigger acorn for writing glitter-glue names.
