digital

Watch me tell the time.

Print the clock faces and digital rectangles on glossy white photo paper. Students trim and glue on their pocket watch. Teacher calls out a time; using a dry erase marker, students draw hands on the clock face to show that time, and then record the digital time inside the rectangle You could also poke a hole in the center and attach cardboard or paperclip hands. Add some gold glitter for that finishing touch.

Run off on white glossy photo paper. Students trim and glue to their pocket watch. It then becomes a dry erase "board."
