# Olympic Number Puzzles

## Olympics Number Puzzle Directions

A quick, easy and fun way to get your kiddo's sequencing numbers is via a number puzzle. Since New Years is all about counting down, I thought it would be fun to make up some Happy

New Year puzzles from 10 to 0.

One of my Y5 report card standards was to be able to put a puzzle together, so this was especially beneficial.

Print off the puzzles on white construction paper, or card stock, laminate and trim. Keep each puzzle in its own Ziplock Baggie.

Pass them out to your students and set a timer. See who can complete their puzzle the fastest.

When they are done with one, they may exchange theirs with another student who has a different one.

You can use these each year, or skip the lamination and give each child a puzzle to take home. They can cut their own strips, mess them up and put them together.

For an interesting "craftivity" have students cut and glue their puzzle to a sheet of construction paper. Remind them to leave a little bit of a gap between each section for an especially cool effect.

You can also make a puzzle flip booklet. Choose 3 puzzles, cut them apart and staple them onto the number template in a mixed up fashion. Student decide which puzzle they want to "flip and find" and turn over those pages 'til their puzzle is complete.
