Shapely Mouths
Activities
Games, Booklet,
Posters

Run off enough copies for the girls in your class.

Trim off these directions.

Choose a shape word. Show it to the class and read it together.

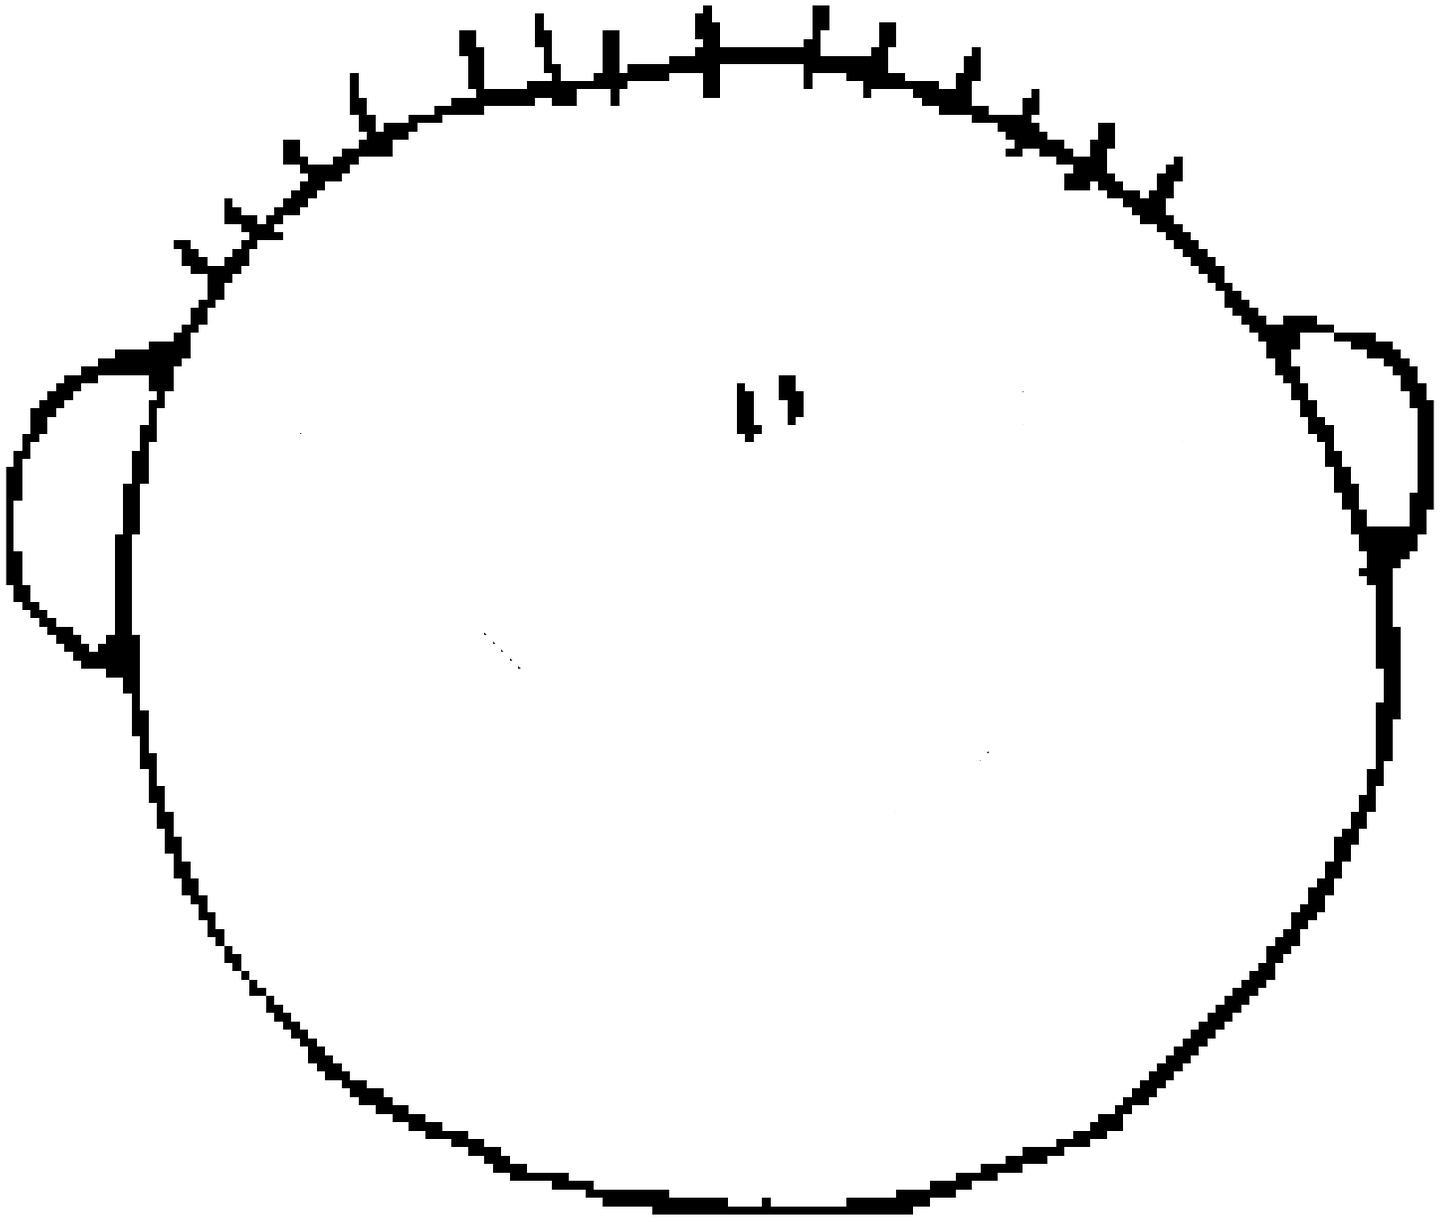

Students place that shape on their face mat, in the mouth position.

You can see at a glance who is having difficulty.

To use this as a learning tool, instead of an assessment, show the word cards that also have the shapes on them.

The other templates with the lines above the face, are to laminate and use each year.

Using a dry erase marker, students look at the selected word card, and write the shape word at the top. They then find and place that mouth-shape on the face mat.

Run off enough copies for the boys in your class.

Trim off these directions.

Choose a shape word. Show it to the class and read it together.

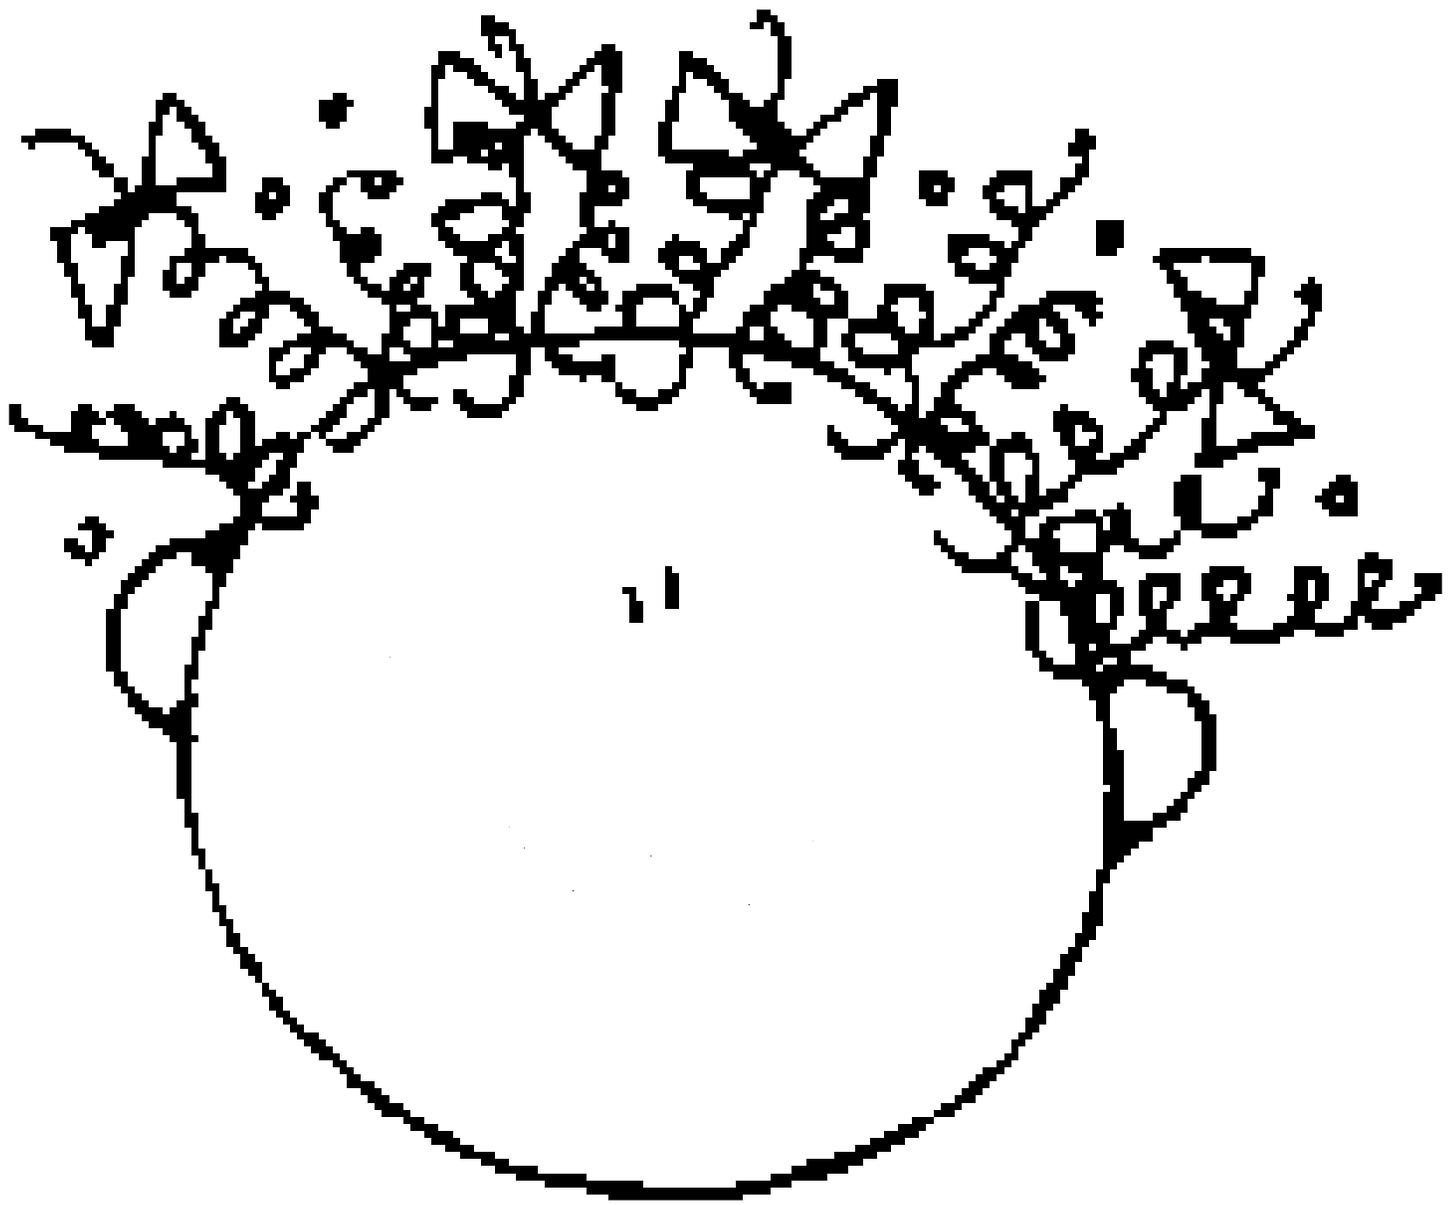

Students place that shape on their face mat, in the mouth position.

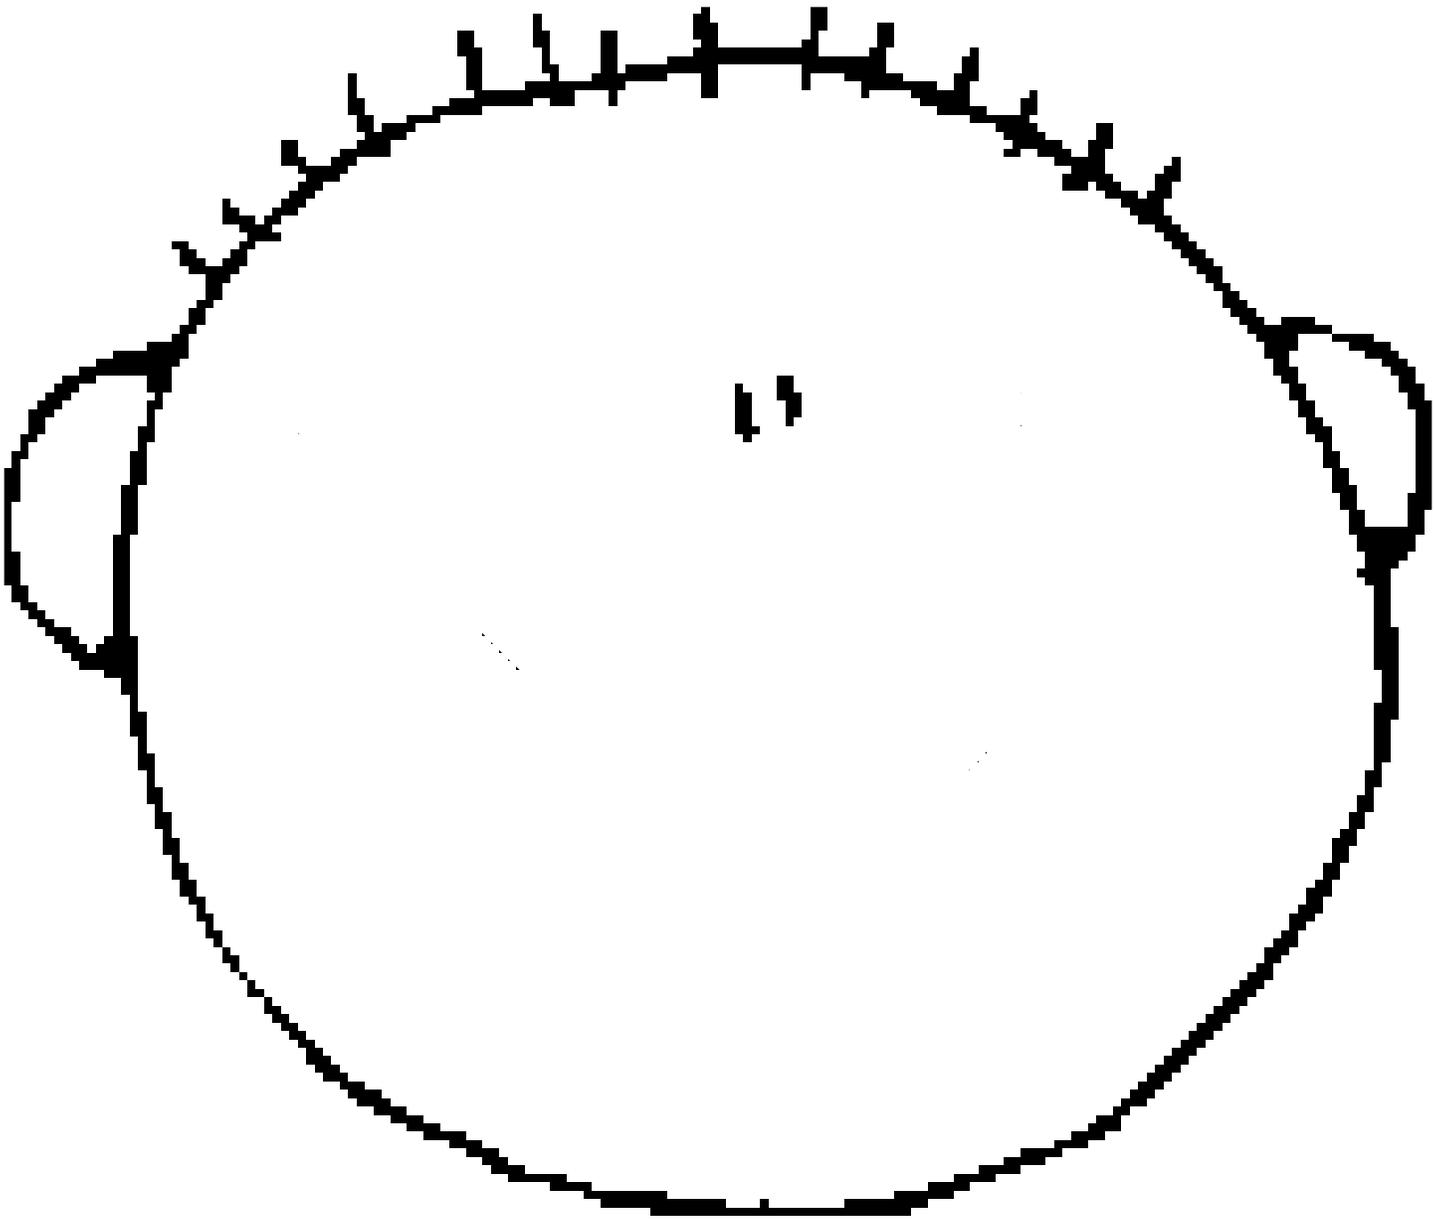

You can see at a glance who is having difficulty.

To use this as a learning tool, instead of an assessment, show the word cards that also have the shapes on them.

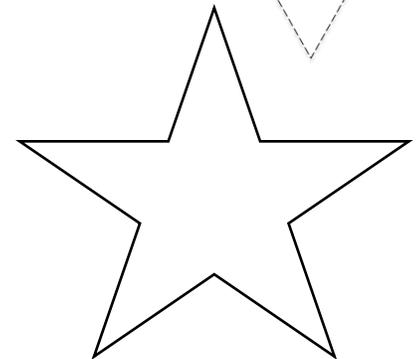

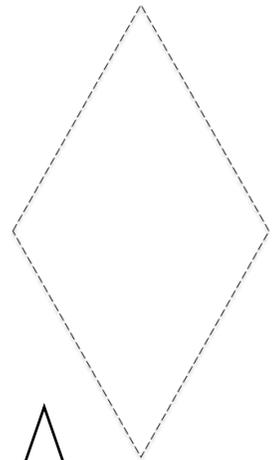

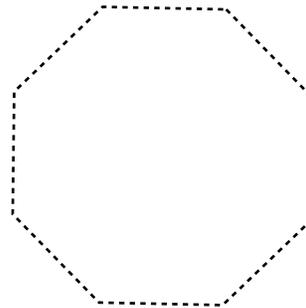

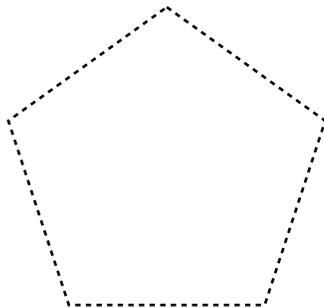

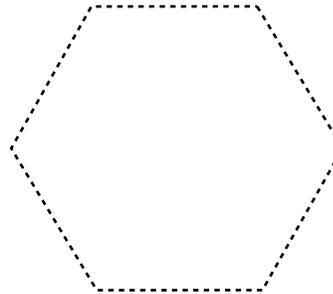

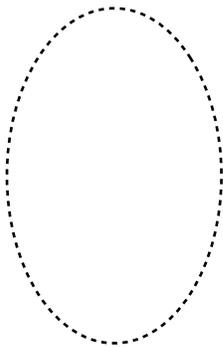

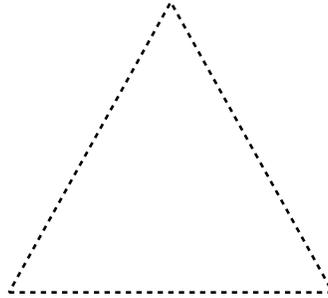

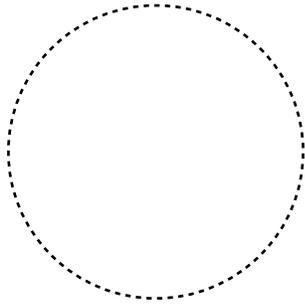

The other template with the lines above the face, are to laminate and use each year.

Using a dry erase marker, students look at the selected word card, and write the shape word at the top. They then find and place that mouth-shape on the face mat.

Templates for the shapely mouth game.

Print on card stock
and then cut out.

Trace the shape onto
the (black, pink, or
red) construction
paper once, then cut
3-6 at a time.

You could also run
this page off and
have children color
their own "mouth"
shapes, and then cut
them out to use as
manipulatives.

However, this is quite
a bit of cutting for a
young child.

Each Child needs
one of each kind of
shape to play the
mouth game.

This is a quick, easy
and fun way to whole
group assess shapes.
