

Print on red, yellow and lime green construction paper; laminate and trim.

Cut slits to the right of the apples.

Students Insert the matching lowercase worm.

Run off on green construction paper and trim. Students insert the lowercase letter worm into the slit on the matching uppercase letter apple. To make this a self-correcting center game, Write the uppercase letter on the back of the worm, or the lowercase letter on the back of the apple card.

Sign your name under the worm and then run off enough copies for all of your kiddos. Keep them in an envelope with the center game. After students have successfully matched all of the lowercase worms to their uppercase letter apples, give them a certificate of praise to color and take home.
