If you don't want to print in color, cut off these letters first. Each pair of students needs only one sheet to spell their names with. They cut out the letters and glue them in the appropriate sections. They get only one sheet even if they both have that letter in their names, because those letters will go in the "same" section on their apple Venn Friend.

What's a Venn diagram?

A Venn diagram is a pictorial representation of two things using circles.

The common elements of the things are shown in the overlap of the circles in the middle section.

The different elements are represented in the outside sections of the circles.

A Venn diagram is an excellent way to show comparison and contrast.
