Proud to be
100 days smarter!

When I started 1st grade, I
thought I knew a lot, yet I was
excited to learn more.

Now I can count to 120, and do
addition and subtraction
problems.

I'm a whiz at "Mad Minute Math"
too.

The thing I'm most proud of,
is being able to read.

We Are

Days Smarter!

Back

My students are 100 days smarter!
They know how to ...

- read
- do word problems
- write
- add
- spell
- define words
- 2s, 3s, 5s, 10s skip count by
- graph
- compare
- subtract
- punctuate a sentence
- tell time
- 2D shapes
- identify 3D shapes
- do place value
- count to 120
- identify 2D shapes
- retell a story
- sequence
- measure

I designed this "We Are 100 Days Smarter!" poster, so that you could use it as a center for your bulletin board display, if you decide to do the "mosaic puzzle art" activity, where students color their puzzle, cut it apart, put it together, then glue each strip to a sheet of construction paper, leaving a tiny gap in-between each strip.

I also included the same poster as a puzzle, to go along with the puzzle theme of your students.

There's a "My students are 100 days smarter! They know how to..." poster prompt that you can fill in with what you've taught your kiddos.

This can go underneath the picture poster on your b. board, or if you want to mix math with literacy, and have your students also complete a writing prompt worksheet, you can glue it to the back, punch a hole in the top, then suspend from the ceiling along with your students' work.

Here is a little something to do
because I'm simply so proud of you!
Love, Mrs. Henderson

can read!

Back **Kaiden**

- To help celebrate 100 Day, I designed the 4-on-a-page mini puzzles, so you could have an inexpensive, quick, easy, and fun surprise lying on your students' desks.

- Simply print, trim, mix up, tuck in a Snack Baggie and attach the "header".

- For an additional activity, to practice counting, when everyone is done with their puzzle, ask them:

- "How many total puzzle strips do you think we have"?

- This should be easy to guess-timate as you simply add a zero to however many students in the class, but it's fun to see if students can come up with the answer, and the strategy they used to arrive at their total.

- After a bit of guessing, count in unison by 10's to 100, by pointing to each child.

- When you've reached 100, start again, and continue "... 80, 90, 100; that makes 200."

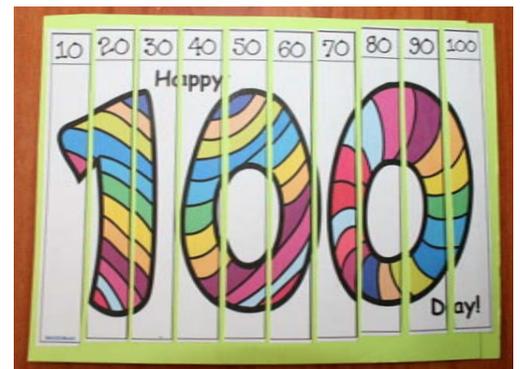

- Continue 'til you have pointed to each child, counting by 10s, and end with the answer. "That makes 200 puzzle strips!"

- If you want to mix math & literacy, after everyone has completed their puzzle and you have done the counting activity above, have children glue the strips on a variety of colors of construction paper squares.
- To create a cool mosaic effect, tell students to leave a little gap in-between each piece.

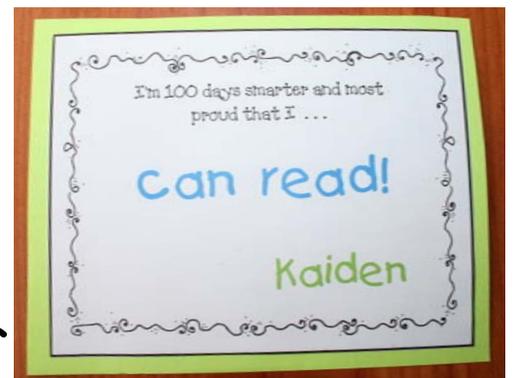

- I've provided a mini writing prompt: "I'm 100 days smarter and most proud that I..." which children complete and glue to the back of their puzzle.

- Punch a hole at the top and suspend from the ceiling.

Designing stuff for TpT, is extra fun because of the awesome clip art & fonts that I use from these talented artists.

Thank you so much for buying this product.

I truly hope you'll love this item & that it will make your life easier & teaching more fun!

To my loyal followers: I promise to post at least one FREEBIE each month that will hopefully knock-your-socks-off.

Please take a moment to leave feedback to earn valuable points, which equal money for future TPT purchases! Woo hoo.

If for any reason you're unhappy, please email me at:
dianetpt@gmail.com

Blessings,

Diane
