Help your students learn their color words in a fun way by having them match the colored crayon to the color word on the crayon box. Make this a file folder center game or a whole group assessment where you run off copies and students use markers or crayons to color the color words in the matching color.

Students can also take their own copy of the crayon sheet home and color it and make their own matching game.

There are also sets of crayons that count by 1's, 2's 3's 5's and 10's. Students can color these, cut these out and sequence them or simply trace and practice counting by those sets of numbers.

Make a set of color-counting strips by running off my masters on colored construction paper, laminating the strips and then cutting them out. There's a blank strip page for the black strips. Run off the black color/number words on white paper (they are smaller) and then glue them to the black strips. Buy some colored paperclips and you've got a reading and math center that your students will really enjoy.

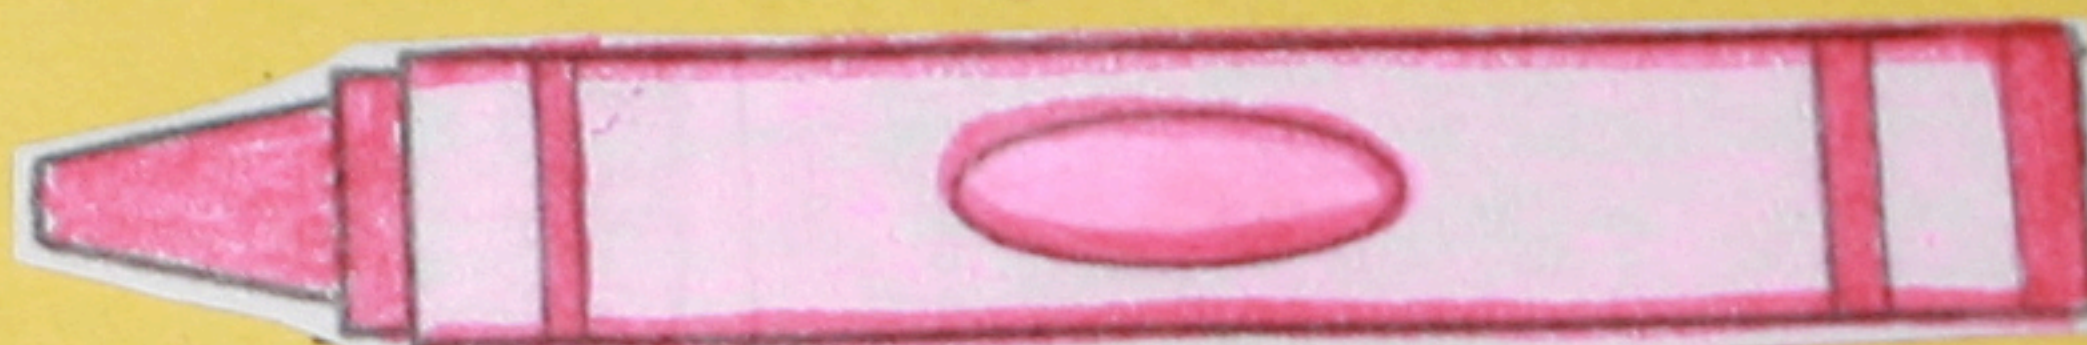

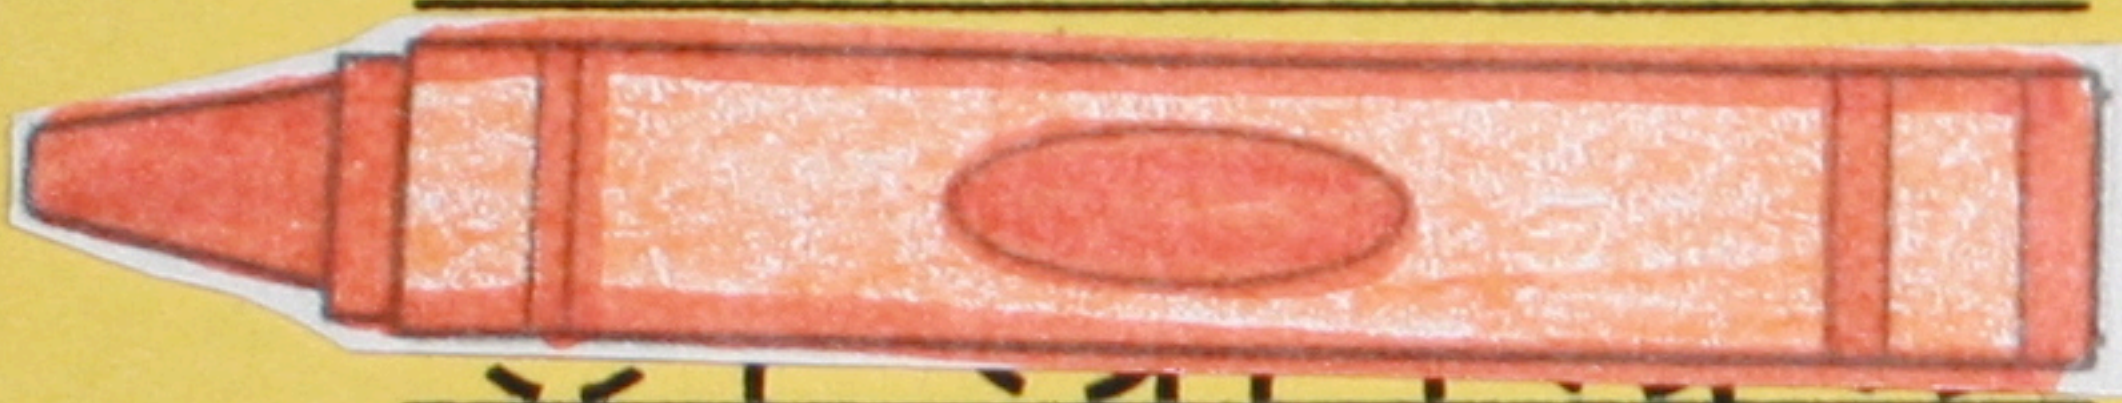

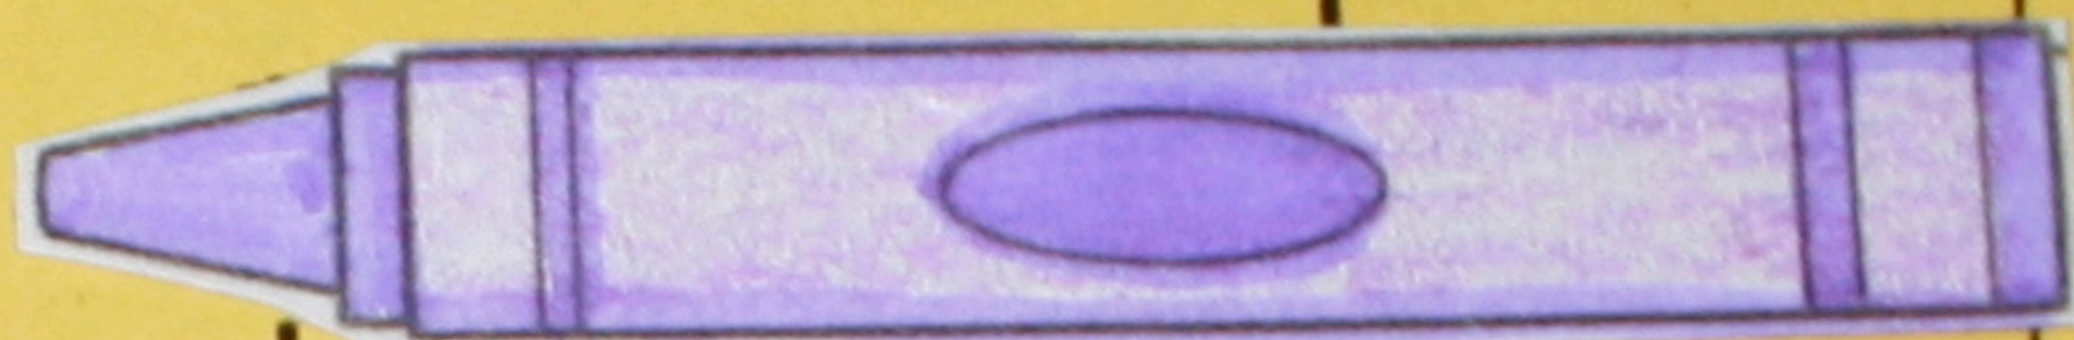

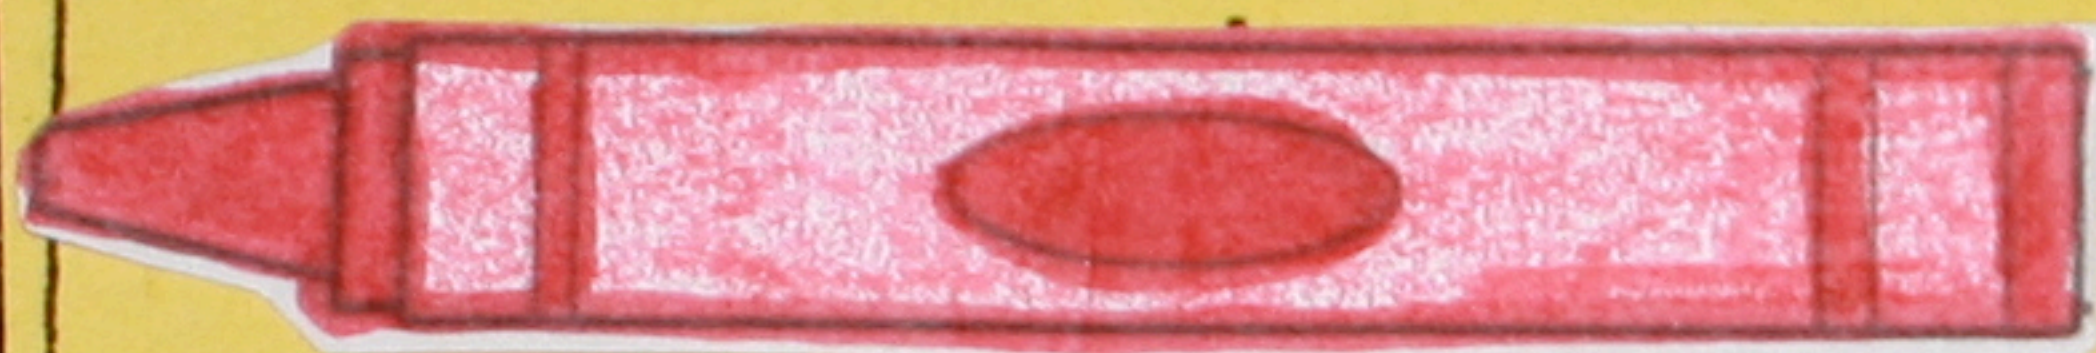

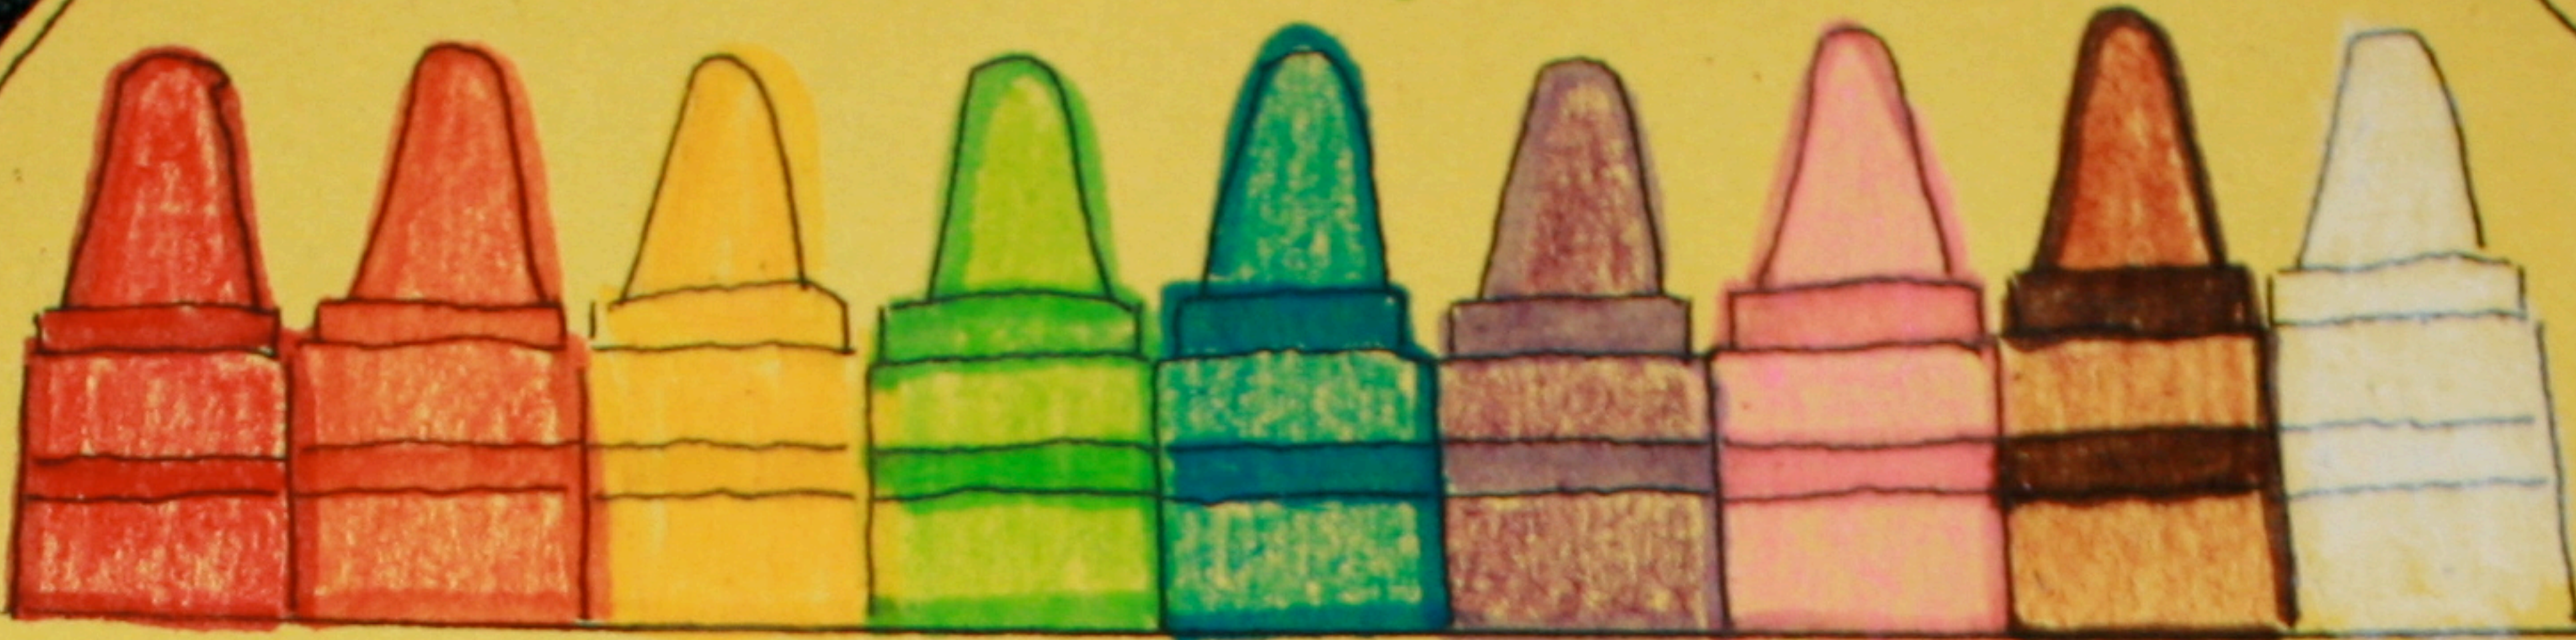

Staples sells a large round box of 1,000 paperclips for only \$3. They also sell black, and purple paper clips in the Jumbo size, and I found orange during October. I have not found brown paperclips anywhere yet, so I bought spray paint that adheres to metal and lightly dusted a set of paperclips that I laid out on newspaper and then flipped over to spray the backs.

If you want students to practice writing, have them use dry erase markers to trace the letters and then have them wipe the strips clean with a wipe.

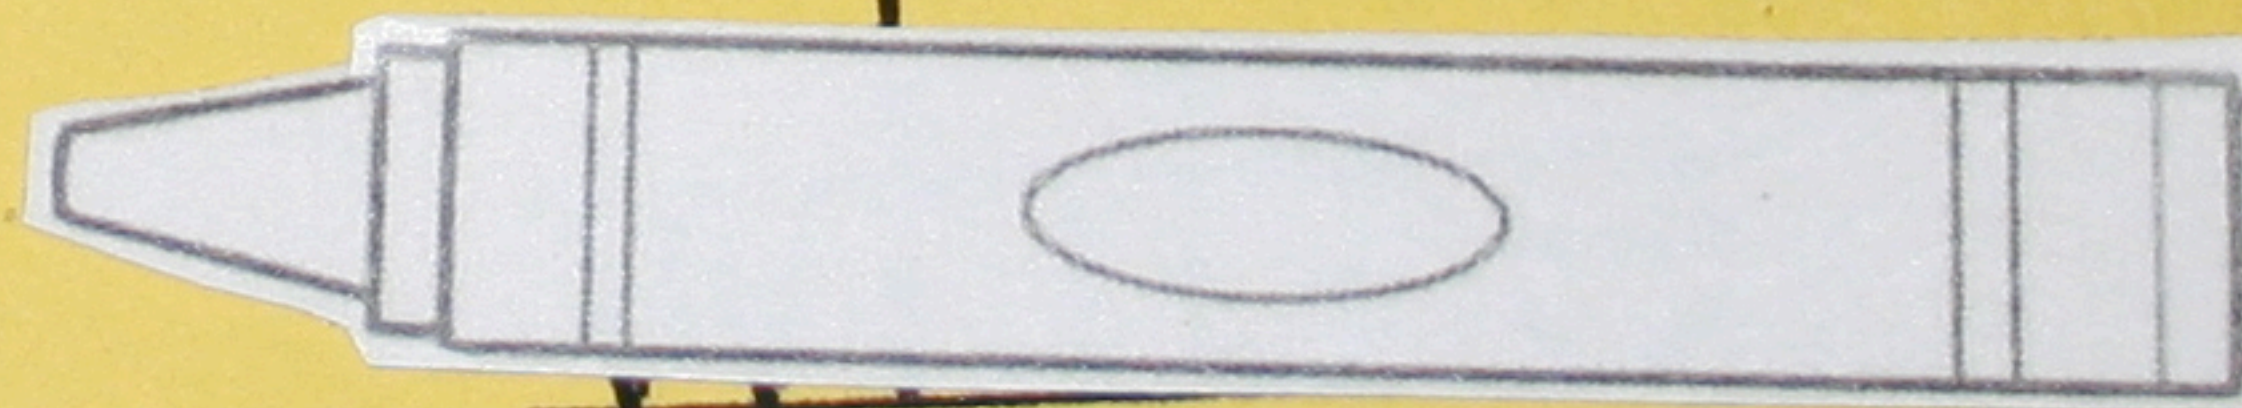

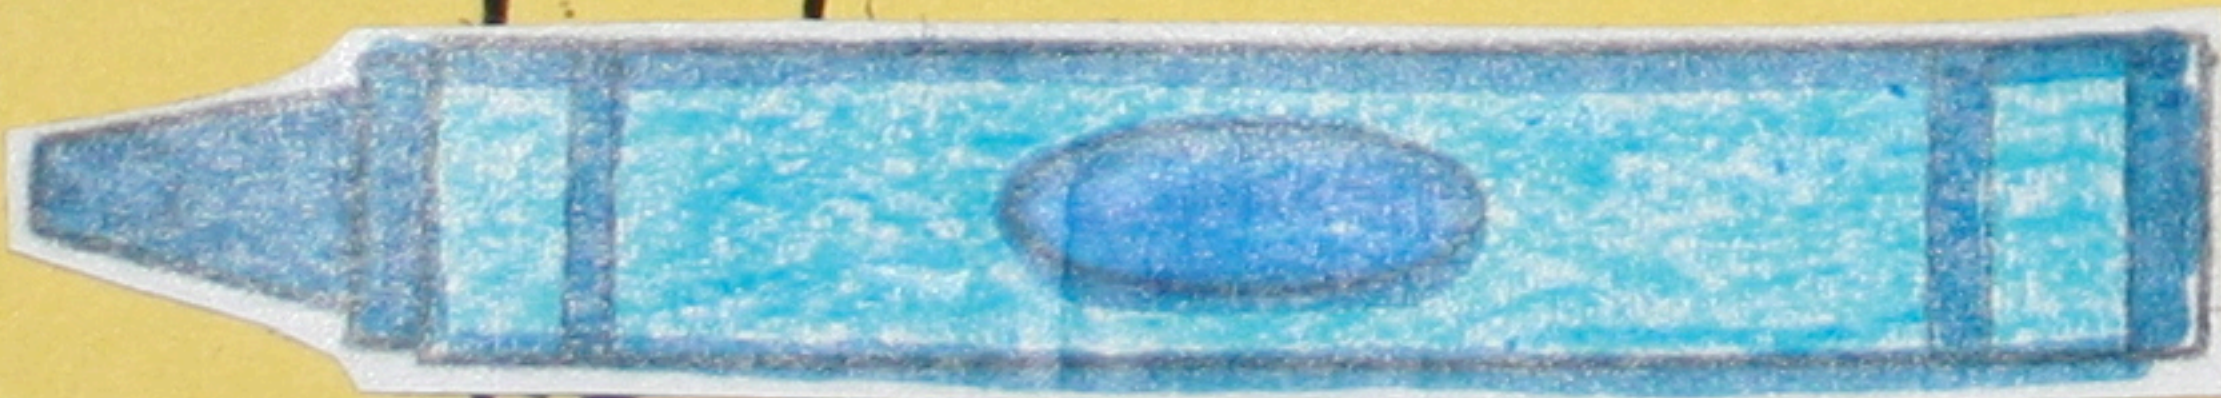

Run off whatever numbers you are working on and have students make Itty Bitty booklets after they are done sequencing them. I've also provided a set of color words, and crayons students can color to match them, with covers for both counting and color booklets. These cards also make great memory match games. Color words to color crayons, number words to numbers, or one set of color-card numbers to another set of color-card numbers. Children can also play "Speed" against each other and see who can sequence or identify the cards the fastest.

Reward students with several certificates of praise.
