Where Have All The
Snowflakes Gone?

©TeachWithMe.com

There were 5 snowflakes.
I disappeared. That left 4.

$$5 - 1 = 4$$

$$\begin{array}{r} 5 \\ - 1 \\ \hline \end{array}$$

2

There were 5 snowflakes.
I disappeared. That left 4.

$$5 - 1 = 4$$

$$\begin{array}{r} 5 \\ - 1 \\ \hline \end{array}$$

2

3

There were 4 snowflakes.

I disappeared. That left 3.

$$4 - 1 = 3$$

3

There were 4 snowflakes.

I disappeared. That left 3.

$$4 - 1 = 3$$

There were 3 snowflakes.

I disappeared. That left 2.

$$3 - 1 = 2$$

$$\begin{array}{r} \\ - 1 \\ \hline \end{array}$$

4

There were 3 snowflakes.

I disappeared. That left 2.

$$3 - 1 = 2$$

$$\begin{array}{r} \\ - 1 \\ \hline \end{array}$$

4

There were 2 snowflakes.
I disappeared. That left 1.

$$2 - 1 =$$

$$\begin{array}{r} 2 \\ - 1 \\ \hline \end{array}$$

There were 2 snowflakes.
I disappeared. That left 1.

$$2 - 1 =$$

$$\begin{array}{r} 2 \\ - 1 \\ \hline \end{array}$$

6

There was 1 snowflake.
It disappeared. That left 0.
Where have all the
snowflakes gone?

$$1 - 1 = 0$$

6

There was 1 snowflake.
It disappeared. That left 0.
Where have all the
snowflakes gone?

$$1 - 1 = 0$$

7

Ask the snowman!
He's new in town and looking
pretty fat!
