

100 100 100 100 100

How Do You Say The Number 100 In Other Languages?

For an interesting look at the number 100, I thought it would be fun to share how other countries say 100 in their language.

After over an hour of research on the internet, plus asking my bilingual friends, I made up a list of 20 ways to say this number.

I kept sourcing sites 'til I found pronunciations to go along with the number and did my best to type "sounds" out for you. The Danish site was a bit difficult to understand and then translate into "how it sounds," so I included the website link for you to hear and differentiate yourself.

As with any other information that flows on the Internet, be sure and check your own sources for accuracy.

If you speak another language and could add to my list, I'd love hearing from you.
diane@teachwithme.com

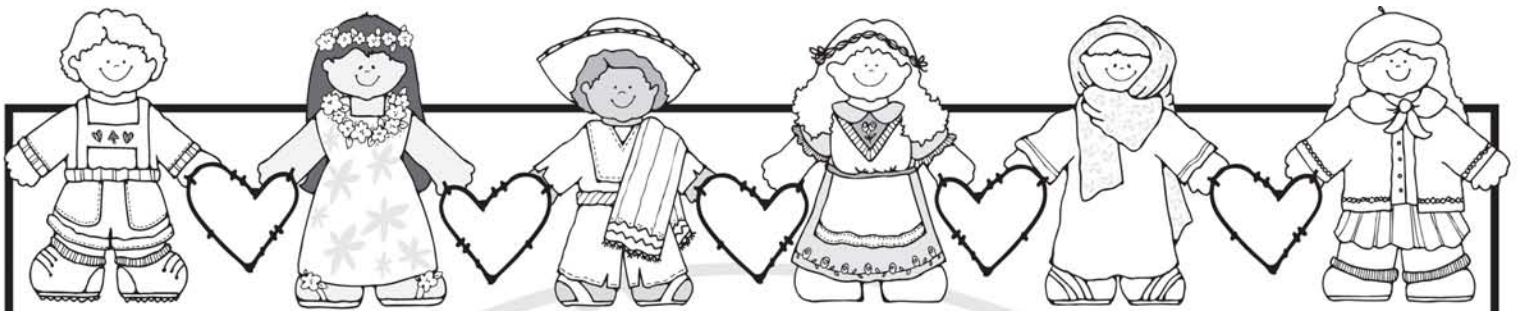

If you're interested in having your students learn to count to 10 in another language, Wikipedia has a great table with a list of the cardinal number names and symbols for the numbers 0 through 10 in various languages and scripts of the world.

http://en.wikipedia.org/wiki/List_of_numbers_in_various_languages

Where possible, each language's native writing system was used, along with transliterations in Latin script and other important writing systems where applicable.

In some languages, numbers continued through to 20.
