Where's  
Johnny Appleseed?  
Shape Game

Print on card stock, laminate and trim.

Hide a Johnny card under one of your shape apples that are displayed on your white board, or on a wall. I hold my apples in place with a magnet.

Call on a quiet student to guess which shaped apple Johnny is hiding under. Remind them to say the shape.

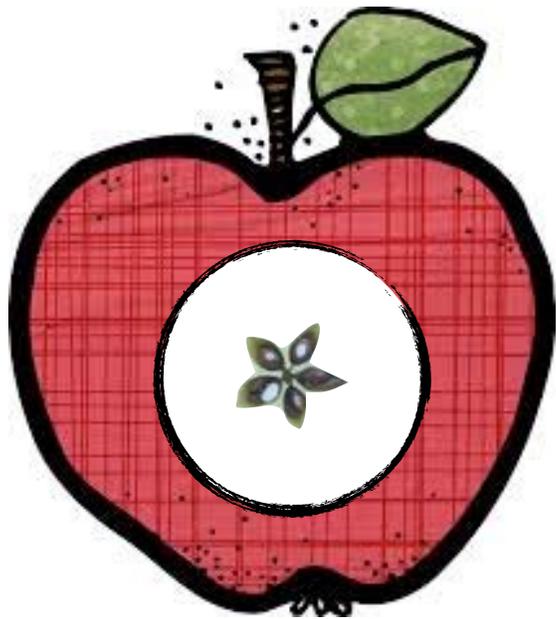

Lift up that shape. Is he there? If not, have that child call on someone else to take a guess. Play continues 'til Johnny is found.

I've included extra Johnny cards in two different sizes, incase you lose one or it gets damaged.

Print, laminate and trim.

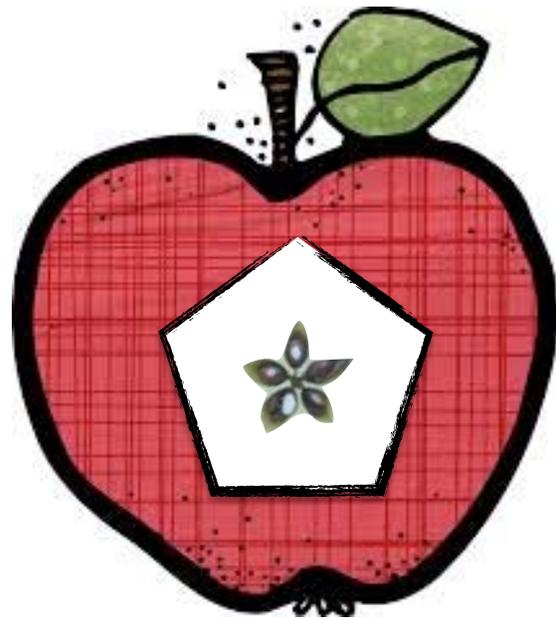

Put a magnet or piece of Velcro (scratchy side) on the back to use on a white board or flannel board.

You can also make this a "flip up" by folding the word section, and taping that down, and then flipping up the bottom apple portion to reveal if Johnny Appleseed is hiding under that shape.
