# Roll and Color The Community Helpers
## Addition Dice Game

Community Helpers Are "Bear-y" Special ~ Clip art bear graphics copyright by:
**DJ Inkers** www.djinkers.com

Directions:

You can run off a few of each kind of community helper, and give students a choice of which one they want to color for the dice game, or you can choose whatever community helper you are working on,
and give each child the same one.

Before you begin, have students point to each number. As a whole group, count to 12.

Explain to students that whatever number they roll, is the section that they color.

Demonstrate how you roll one die first, and then color numbers 1-6.

If they've already rolled that number, they lose their turn.

When students have completed those sections, they roll 2 dice, and then add them together to get numbers 7-12 to color.

The child who colors all of the numbered sections first, or has the most numbers colored when the time rings, is the winner.
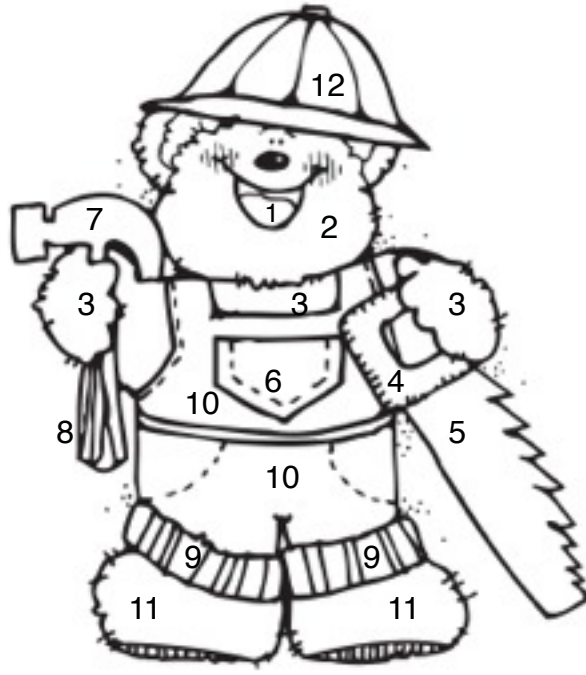

After you explain the game, have students choose a partner to play with.

Remind them that they should write their name on their paper, as well as trace and write the name of their community helper.
