pounds

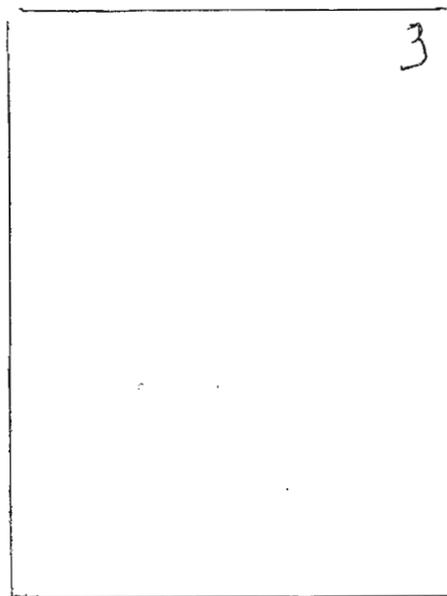

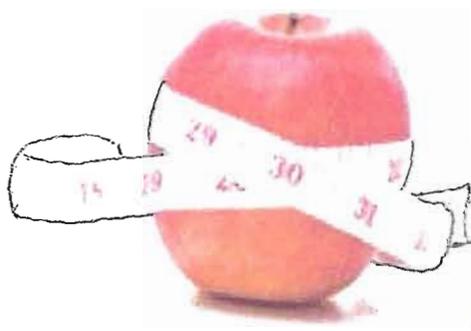

ounces

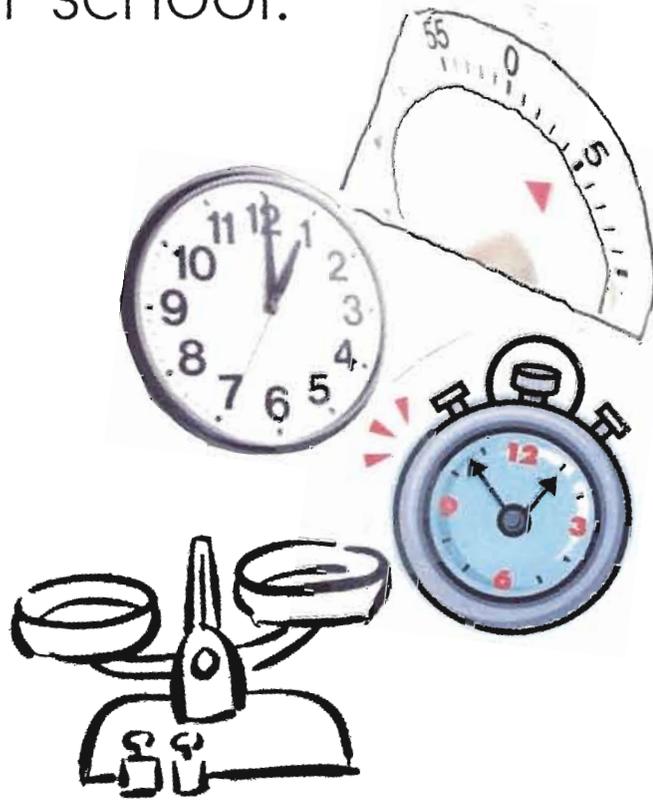

We measure with a measuring tape.
It measures around things. This is their
circumference.

measuring tape

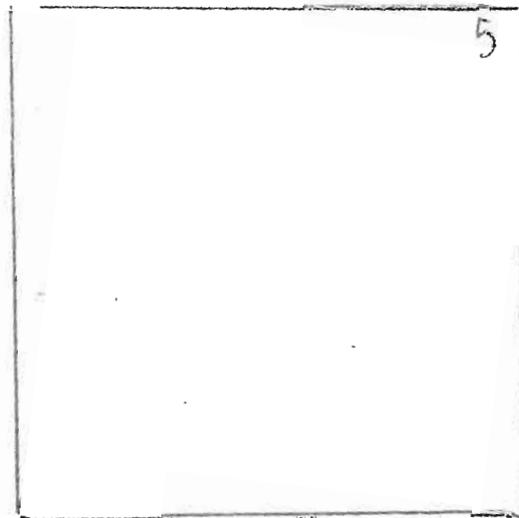

circumference

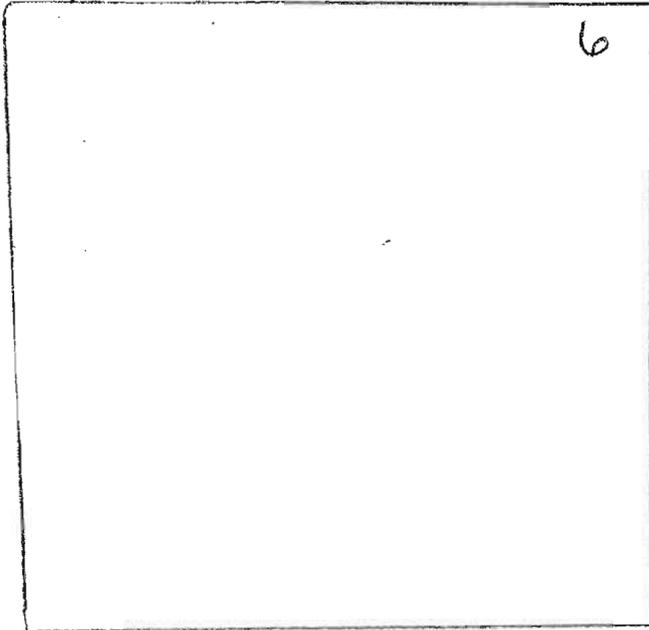

We measure at school.

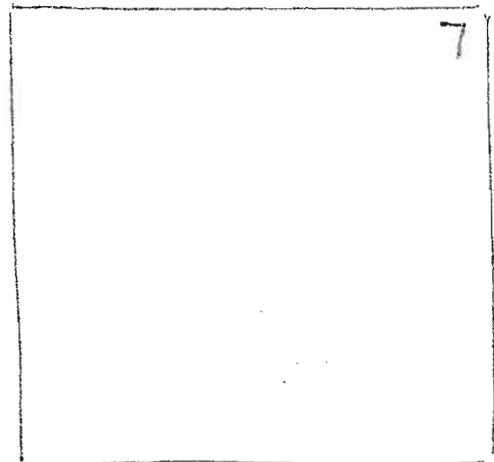

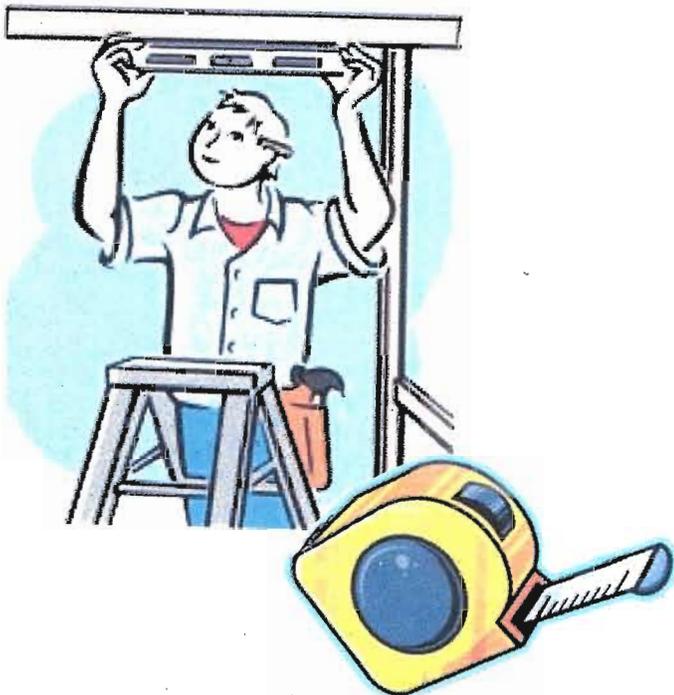

We measure when we cook.

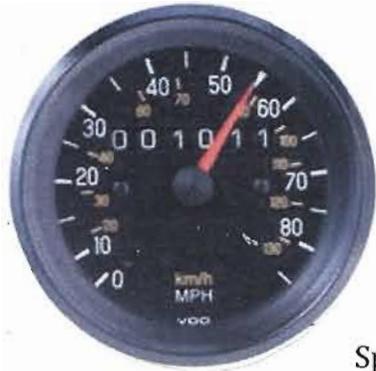

We measure when we sew.

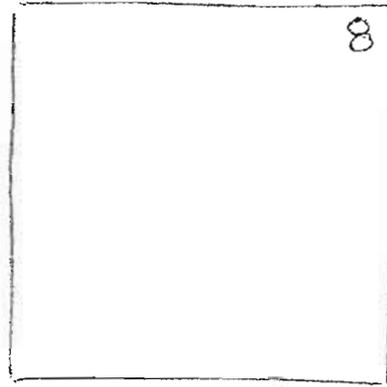

We measure when we build.

We measure when we are in the car.

Speedometer:
How fast?

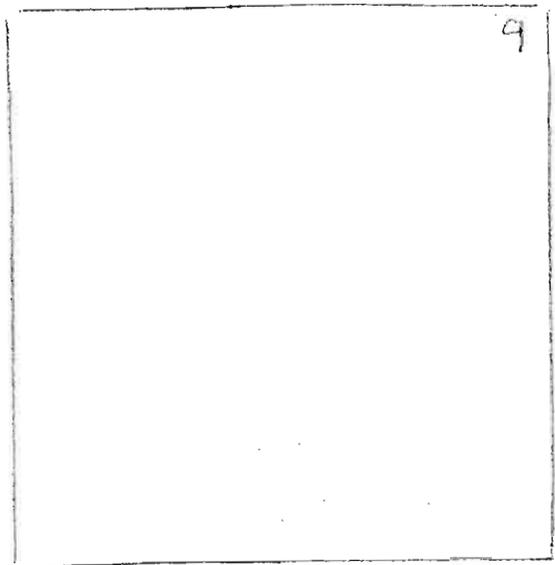

Fuel gage:
How much gas is left?

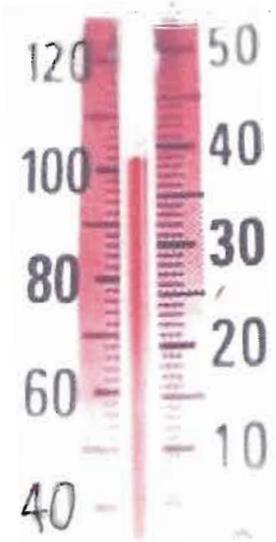

Odometer:
How many miles?

We measure when we are sick.

We measure the weather.

Measuring Activity

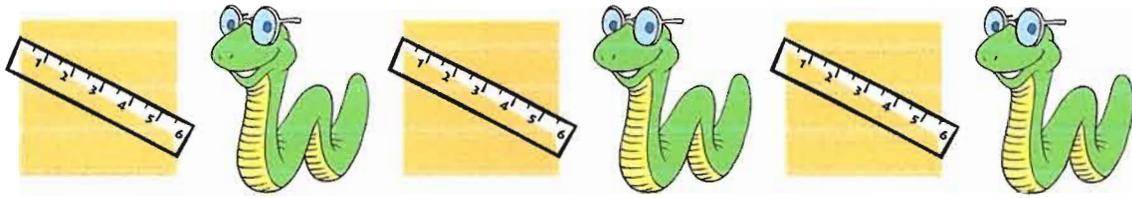

1. Have students make their own Isabella Inchworm.
2. Children go around the room measuring things and see if they can find 3 things that are exactly 12 inches long.
3. Making tally marks have them total up how many things they can find that are less than Isabella and how many things they measure that are more than Isabella.

_____ 's Isabella Inchworm

_____ 's Isabella Inchworm

What 3 things did you find that are 12 inches long?

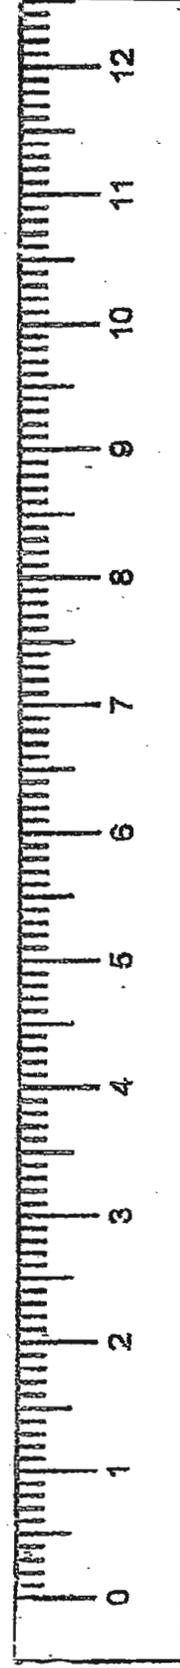

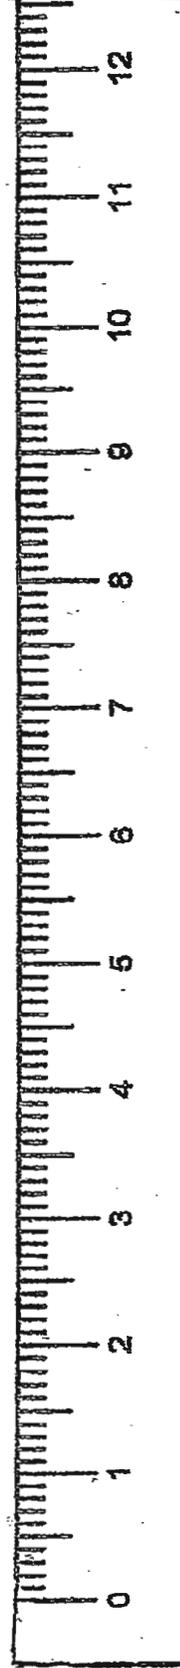

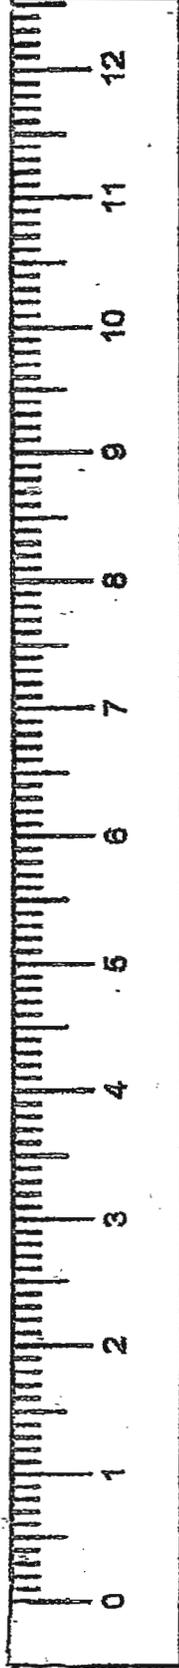

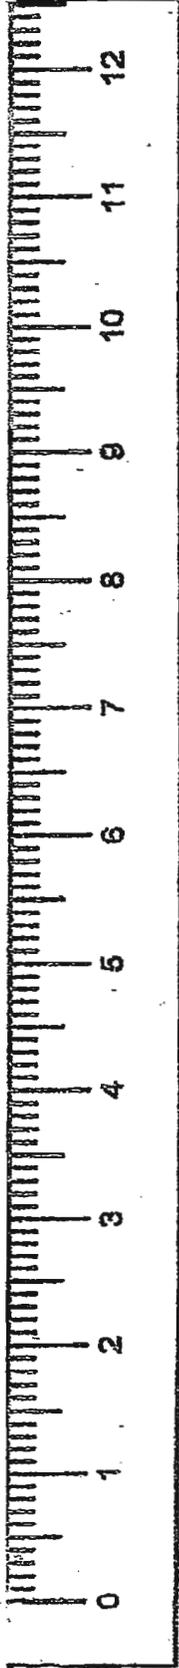

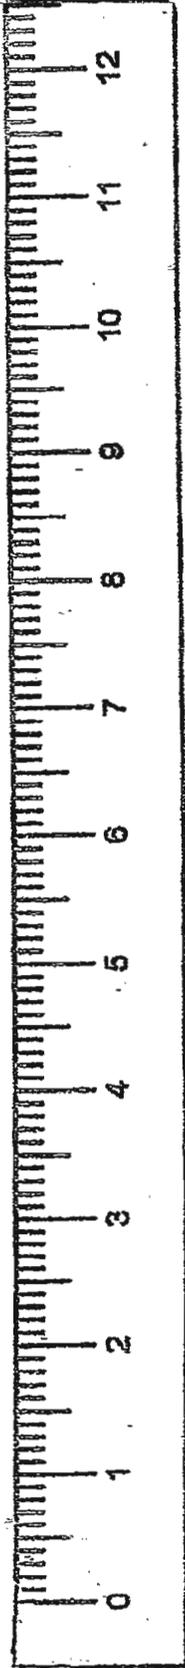

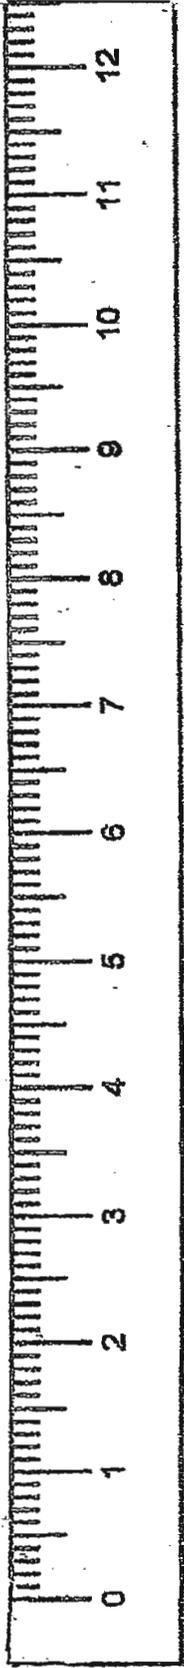

1.

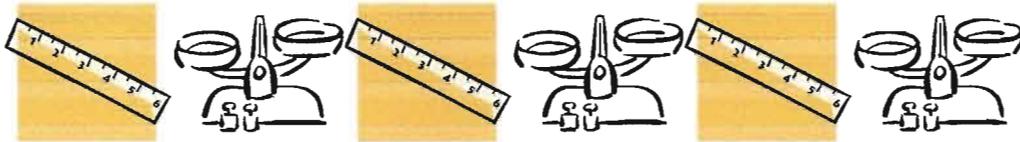

2.

3.

How many things did you find LONGER than Isabella? (Tally marks)

How many things did you find shorter than Isabella?

Congratulations!

knows how to weigh and measure things!
Keep up the great work!
